

Birch® TotalCloud® File Storage

Birch TotalCloud File Storage provides a simple solution to store confidential business files with unparalleled security. Files are stored securely in our compliant data center that has achieved the most rigorous audit standards in the industry, including HIPAA, PCI and SOC3.

You can access, revise, delete and share files on all of your devices as easily from home or at a customer site as you can from the office. Files can be shared via email links, so there's no need to send large files. Plus, you can password-protect files or set an expiration date for the links.

With Birch's TotalCloud File Storage you can finally go from consumer-grade and commodity file storage to an enterprise-grade solution that's right for your business:

- Secure and organize files and folders with a user-friendly Web UI
- Set personal, private folders for every employee
- Upload, download and share files via mobile apps for phones and tablets
- Share files via email links without attachments that might be tagged as spam
- Collaborate with version control and by leaving messages on files
- Limit file access to designated users via folder permissions
- Use sync folders on your PC to automatically back up files to the cloud
- Set up folders to sync daily, weekly or on any schedule you need
- Map drives to save files directly from applications on your PC to the cloud
- Access files from any internet connection on all your devices
- Ensure files are safe and accessible even if your PC crashes or is lost
